

# INSTANT CELLULAR CONNECTIVITY

## For Solar Systems and Reliable Backhaul Applications

OptConnect provides a fully managed wireless service for monitoring solar equipment. Rather than relying on a customer's Internet connection, OptConnect provides a simple and complete, plug and play, cellular solution for uninterrupted remote access and management.

OptConnect removes the delays and complexities of typical wireless deployments. By providing all the hardware, monitoring, manageability, reporting, and security all bundled together for one low monthly fee.

### OptConnect Managed Wireless Solutions Provide

**Cost Savings**  
Low flat monthly fee  
with no upfront costs

**Speed to Market**  
Plug and Play

**Ease of Deployment**  
No coordination with  
local IT needed

OptConnect removes the delays and complexities of typical wireless deployments. By providing all the hardware, monitoring, manageability, reporting, and security all bundled together for simple plug and play functionality solar system OEMs and deployers demand in these challenging times.
